GitHub: github.com/ayushijogi08-art

Professional Summary

Full-Stack Web Developer with strong backend foundations, experienced in building end-to-end web applications using JavaScript, Node.js, MongoDB, Firebase, HTML, and CSS. Hands-on experience in developing scalable REST APIs, implementing JWT-based authentication (access & refresh tokens), designing database schemas, and integrating frontend interfaces with backend services, including media handling, search functionality, and user activity tracking.

Technical Skills

Backend & Programming: JavaScript (core concepts, async basics), Node.js (REST API development)

Web Technologies: HTML, CSS, Responsive Web Design

Databases: MongoDB (CRUD, schema design, Node.js integration), Firebase Realtime Database (CRUD, real-time sync)

Tools & Platforms: Postman, Cloudinary, GitHub, Visual Studio Code

Projects

Grocery Store Management System | JavaScript, Firebase, HTML/CSS

- Developed a real-time inventory tracking system that digitized sales, purchases, and stock management, replacing manual bookkeeping.
- Engineered a persistent data layer using Firebase Realtime Database to synchronize inventory levels across devices instantly.
- Built automated financial logic to calculate real-time Profit & Loss reports based on dynamic transaction history.
- Managed customer and vendor debit/credit records with complete transaction history.
- Optimized the frontend responsiveness to ensure seamless usage on mobile phones, tablets, and desktop systems.

Video Streaming Platform – Full Stack Web Project

- Designed and developed backend REST APIs using Node.js and JavaScript.
- Connected backend services with MongoDB and implemented CRUD operations.
- Integrated Cloudinary for video and image storage and retrieval.
- Implemented JWT-based authentication and tested APIs using Postman.
- Developed frontend interfaces using HTML, CSS, and JavaScript and integrated them with backend APIs.

Education

Master's in Computer Management (MCM) — 2024–2026

Bachelor of Commerce (B.Com) — 2021–2024

Languages

English, Hindi, Gujarati, Marathi
